EDGE LEARNING SERVICES

Edge Learning Services is an award-winning eLearning developer specializing in instructionally designed animation in learning. With over 20 years of experience in the industry, we have a deep understanding of the unique training needs of this sector.

Our animated eLearning courses are engaging, informative, and effective. We use the latest instructional design principles and animation techniques to create courses that are easy to understand and retain. Additionally, we offer a service for updates to existing eLearning courses, whether developed by us or another provider.

Our courses have been developed for a vast range of topics including inductions and safety and compliance in the areas of corporate, sites, processing, mining, exploration and services. We use a variety of authoring tools including articulate and captivate and can assist in LMS management. Our eLearning courses are all SCORM compliant.

We also offer development and design of all categories of training materials ranging from an individual courses up to company wide training needs.

Our technical writing services are also available for development of traditional training materials.

Our value and customer service is unrivalled and our services are highly sought after and regarded in the industry.

CASE STUDIES

Client:

HANCOCK IRON ORE

Project:

BLENDED TRAINING PACKAGE

Hancock Iron Ore required a training solution that would improve the skills of loader operators and mobile equipment operators while integrating seamlessly with existing on-the-job training methods.

Edge Learning developed a blended training package that combined engaging digital learning with practical trainer resources, designed specifically to complement on-the-job instruction. This approach ensured operators could build both theoretical knowledge and practical skills while giving trainers structured tools to enhance their delivery.

The training package is being successfully rolled out across Hancock Iron Ore's operations. Based on this success, Hancock Iron Ore has re-engaged Edge Learning to deliver additional training courses to further develop workforce capability.

Demo courses are available at:

CASE STUDIES

Client:

K92 MINING

Project:

ONGOING ELEARNING DEVELOPMENT

K92 Mining owns and operates the Kainantu Gold Mine, a high grade underground mine located in the Eastern Highlands of Papau New Guinea.

K92 is undergoing a major expansion and needed a full suite of training materials for it's growing underground workforce. Training materials were required to cover inductions, health and safety topics and all operator training.

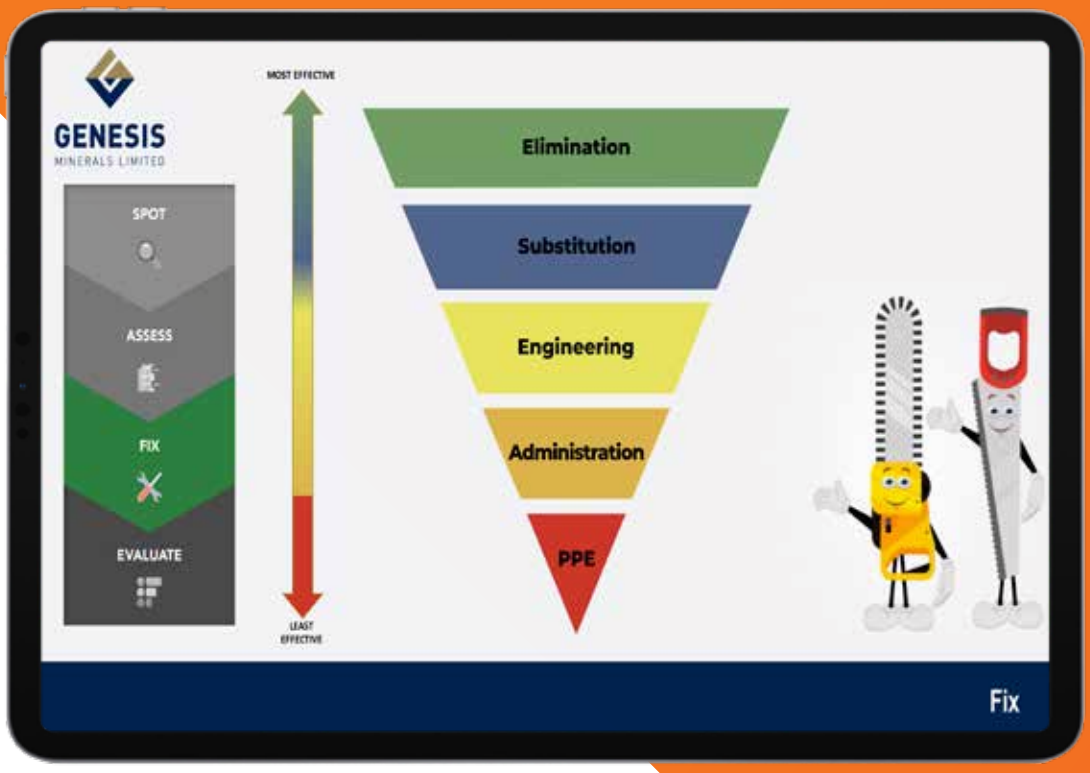

Edge Learning was engaged to develop a variety of materials including elearning, manuals, assessments and classroom presentations. The materials were aligned to RII standards and specifically designed to suit the literacy levels at the K92 operation, using high levels of visual graphics.

The materials are now in use at K92 as the mine rapidly expands and more materials are under development.

Demo courses are available at:

CASE STUDIES

Client:

GENESIS MINERALS

Project:

ONGOING ELEARNING DEVELOPMENT

Genesis engages Edge Learning to develop all elearning courses including inductions and safety courses and update courses previously developed by a different provider.

This work began in 2020 for Dacian and the relationship has continued through the acquisition. To date, Edge Learning have developed over 20 elearning courses for Dacian/Genesis and continue to provide support and updates when required.

Demo courses are available at:
courses.edgelearning.com.au/demo

Client:

VAULT MINERALS

Project:

ANIMATED ELEARNING COURSES

Vault Minerals had a range of courses that needed developing, updating or enhancing to support their expansion and to meet the training requirements of their new project in Canada.

Edge Learning partnered with Vault Minerals to create a suite of engaging, high-quality animated elearning courses designed to support both their Australian and Canadian workforce, including inductions and compliance based courses.

As Vault Minerals' workforce and projects grow, they continue to partner with Edge Learning, and we look forward to strengthening this successful collaboration into the future.

Demo courses are available at:

CASE STUDIES

Client:

CATALYST MINING

Project:

ONLINE INDUCTION

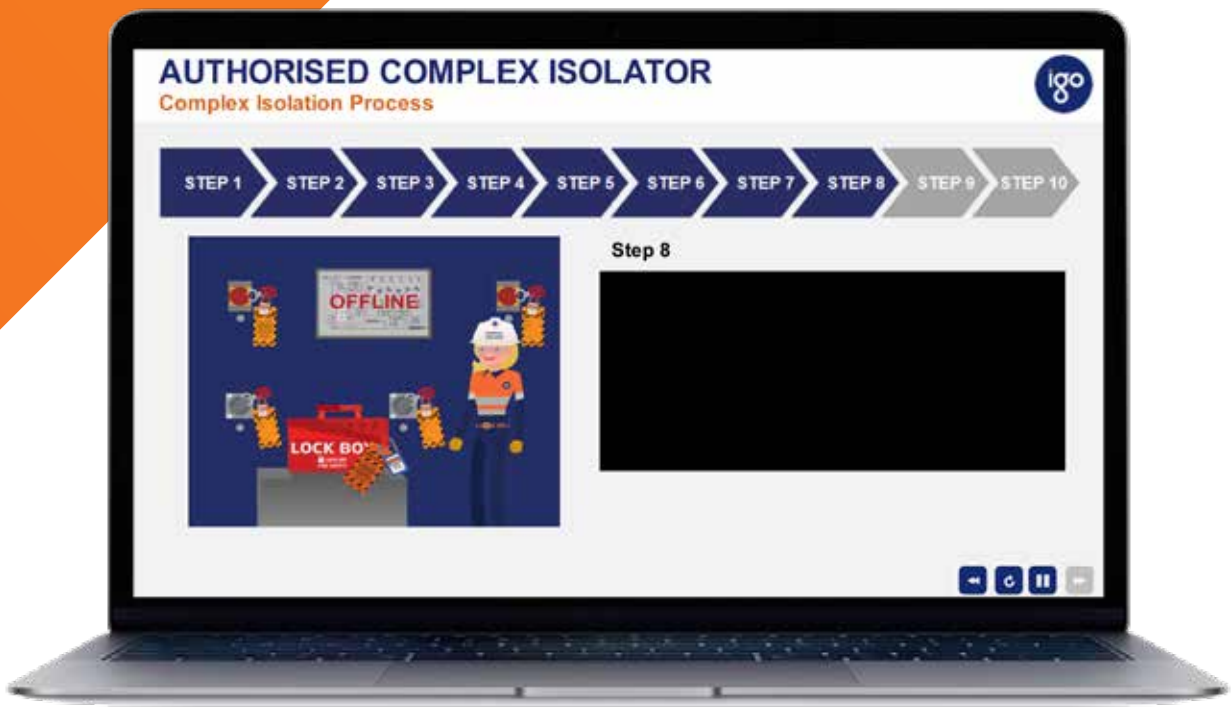

Catalyst operates the Plutonic Gold mine in the Eastern Goldfields of Western Australia.

Catalyst required an online induction to more efficiently onboard it's employees, contractors and visitors to site. Catalyst engaged Edge Learning to deliver a well designed, highly engaging induction that covered all required information and was easy to understand and navigate.

Catalyst has since used the induction to onboard hundreds of personnel working or visiting the mine.

Demo courses are available at:
courses.edgelearning.com.au/demo

Client:

IGO

Project:

ONGOING ELEARNING DEVELOPMENT

Edge Learning Services have been developing eLearning courses for IGO since 2017. During this time, we have developed over 30 courses including inductions, safety courses and compliance courses. Edge has developed courses in the areas of mining, processing, exploration and corporate departments and updated a number of courses previously developed by a different eLearning developer.

IGO and Edge Learning continue to enjoy an excellent working relationship and we look forward to providing more ongoing support as IGO expand and enjoy further success.

Demo courses are available at:

CASE STUDIES

Client:

ROY HILL

Project:

TRAIN CONTROL TRAINING PACKAGE

Roy Hill engaged Edge Learning to provide an updated and modernised training program for new Train Controllers in the Rail Control Operations Centre. The new package maps to the Certificate IV Rail Network Control TLI 40921 qualification and includes online courses, activity plans and assessments.

Roy Hill are amazed at how effectively the concepts can be shown using animation and have engaged Edge for numerous future projects.

Demo courses are available at:
courses.edgelearning.com.au/demo

Client:
ALLKEM

Project:
ALLKEM CCM

Edge Learning were recently commissioned by Allkem for the first time to develop an animated course for their critical control management for their Mt Cattlin project.

Edge Learning developed the template, formatting and characters and assisted with research, working with Allkem to develop a storyboard for the course. The result is a mostly animated course that keeps the learner engaged and simply and effectively shows how the process of Critical Control Management works. Allkem were thrilled with the result and are now rolling out the training to the Mt Cattlin team.

Demo courses are available at:
courses.edgelearning.com.au/demo

OUR PROCESS

01

Discovery

- Tell us what you need
- Audience, topic and time line
- Expectation, what you already have and what LMS you are using

02

Propsal

- Scope, estimated time line and investment
- Ready for you to check
- Agreed in writing before we start

03

Storyboard

- Build full story board
- Flow, script and what appears on each slide

04

Sign-off

- Time line for reviews
- Ask for assets

05

Build

- Characters, colours and layouts match to your brand
- Animation, graphics, interactions, assessments are all combined

06

Review

- Unlimited review rounds
- No extra cost
- No clock running

07

Launch

- SCORM compliant, direct to your LMS, or packaged and ready to upload

08

Ongoing Support

- Update as your operations evolve
- Partners for the long term

TESTIMONIALS

"Edge Learning recently completed an outstanding project for Hancock Iron Ore. Their work was executed to a professional standard, and I found the company very easy to work with. I highly recommend them and look forward to collaborating with them again in the near future.

TYSON POOLE, **HANCOCK IRON ORE.**

"We recently collaborated with Edge Learning Services on a major project for K92. They understood the learners in PNG and what was needed for the workforce. The materials were clear and suited the learning styles and capability levels of the people using them. The graphics were really valuable, and their extensive understanding of underground mining machines and equipment was clear in the training materials. Their work made a significant contribution to the successful expansion of the K92 workforce.

BRAD STEARNES, **TECHNICAL SAFETY SOLUTIONS (CONTRACTED TO K92)**

"Working with the Edge Learning Team on multiple projects has been a rewarding and highly effective experience which has made significant improvements in how our personnel interact and engage with training content. Having worked with mining companies for some time the Edge Learning Team understand the risks in our industry and how to present the information to our people for the best outcome.

ROBERT KIDD, **VAULT MINERALS.**

"Edge are agile, thorough and know the product. It has been a great experience working with them and we look forward to a continued relationship. Edge has taken the stress out of managing and maintaining our eLearning platform.

BRIAN MOSS, **GENESIS MINERALS LIMITED**

"The Edge team are a pleasure to work with. Their expertise and collaboration have added significant value and enhancements to our eLearning platform.

PAUL THOMPSON, **ANGLOGOLD ASHANTI**

"The Edge Learning team are prompt and have great ideas when developing eLearning packages. Thanks for the great work.

EMMA O'DONNELL, **IGO EXPLORATION**
